Change the color: You can take these black and white labels to a copy center and change the background color (white) by copying it to any available color paper that will coordinate best with your display board design.

DO NOT FORGET to write your name, teacher name, and project title on the backside of the right-side panel. If you use a header board for your title you must write your name and teacher name on the backside too. Use the “Display Board Checklist and Layout” form provided by teacher.
